

## Technology

CSS 3.0, HTML, PHP, MySQL

## Work Plan

The project will have different stages. Email approval is mandatory for each stages to proceed to the next stage. Changes made in the stages after approval on both design and features will be considered as additional work.

## Time Plan

Total time plan required for the project will be 60 working days (Working Days will be counted as International Working days - Monday through Friday. Changes and Requirement made on the off days will be considered on the first working day following) from day of Initial Payment. This time estimate doesnot include the time elapsed for approval during the stages.

Not just best but **LEGENDARY** customer service is our goal.

# What we do

Bluesky Technologies is an IT company, who keeps its services up-to-date with the latest trends in the market. We have earned high reputation by providing our customers all over the world with the best, high-end-class and easily extensible internet products. Our services include Software Development, Web Designing and Development.

## Website Design and Development

We offer high-quality web design and development that can make your business stand out online. No matter if it's a special feature, we can handle any project to create, maintain, support and promote your websites, all in one place, with far less risk.

## Cumulus CRM

CUMULUS CRM is a completely transformed, individualized CRM user experience that is immersive, engaging and intuitive. CUMULUS fuses the straightforward simplicity and social aspects of consumer applications with the business process optimization of conventional CRM.

## Cumulus ERP

Cumulus ERP is specifically designed to meet the needs of mid-sized businesses based in one or more markets. It improves performance by giving you a real time overview of every part of your business. It can be customised and scaled up to support expansion into new markets.

## Cumulus HRM

CUMULUS brings to you the best HRM Software, highly efficient, reliable and easy to use with data backup settings with the best secure application architecture and the major advantage is that this software need not be installed to your systems.

## Edumate School management System

Edumate Software is a large database system which can be used for managing school's day to day business. It is a web based solution for schools creating a virtual network between Students, teachers parents and administrators.
